## WORK EXPERIENCE

**INTERN FRONTEND DEVELOPER
AT ACADEMLO**                                                                        jan 2023 - feb 2023

https://para-cuando.vercel.app/e

- Worked alongside teammates to develop the front-end of events voting application.
- Made layout according to designated figma design.
- Created functional components and fully responsive and dynamic pages.
- Displayed dynamic data provided by the back-end.
- Successfully identified, diagnosed, and fixed website problems, including broken links, typographical errors, and formatting issues.
- Adapted with ease to new technologies.

## PROJECTS

**RiCK&MORT APP**
- *Implementation of React JS technologies as components, asynchronous calls, global variable contexts, hooks.*

https://rick-morty-mica-carballo.netlify.app/

**WEATHER FORECAST APP**

https://weather-app-mica-carballo.netlify.app/

- Retrieve data from multiple third-party restful APIS.
- code written with updated syntax including javascript async/await functions.

**POKEDEX APP**

https://pokedex-mica-carballo.netlify.app/

- Retrieved data from api using react axios.
- Created routes to navigate through the website.
- Created global states through Redux.
